

Pravesh Kumar

Senior iOS Developer & Mobile Team Lead

+91-9452627655 • praveshdubey99@gmail.com • India • [linkedin.com/in/pravesh-dubey](https://www.linkedin.com/in/pravesh-dubey)

PROFESSIONAL SUMMARY

Results-driven Senior iOS Developer with 11+ years of industry experience, specialising in building and shipping high-performance mobile applications for health, wellness, and productivity domains. Proven leader with a track record of owning full product cycles — from architecture design and API integration to App Store delivery — while driving measurable improvements in performance, maintainability, and team velocity. Currently the sole iOS engineer and mobile team lead at Thinkverse, overseeing cross-platform strategy alongside Android and backend teams.

CORE COMPETENCIES

Languages: Swift · Objective-C

UI Frameworks: SwiftUI · UIKit · Core Animation · Core Graphics

Concurrency: Combine · Async/Await · Grand Central Dispatch (GCD)

Data & Storage: Core Data · Keychain · RESTful APIs · Firebase (Firestore, Analytics, Crashlytics)

Device APIs: HealthKit · Push Notifications · In-App Purchases · Background Fetch

Architecture: MVVM · VIPER · MVC · Modular / Clean Architecture

DevOps & Tools: Xcode · Git · Bitrise · Fastlane · TestFlight · Instruments · XCTest · App Store Connect

Practices: Agile / Scrum · CI/CD · Code Review · TDD · Technical Mentoring

WORK EXPERIENCE

Senior iOS Developer & Mobile Team Lead

Thinkverse Jan 2026 – Present | Noida, India

- Serve as the sole iOS engineer — owning the full iOS product lifecycle from architecture decisions and API integration through to App Store delivery and post-release monitoring.
- Lead the mobile team comprising iOS and Android developers; drive feature scoping, API contract discussions, sprint planning, and cross-platform consistency.
- Primary iOS representative in cross-functional discussions with backend, product, and design teams — ensuring platform best practices are embedded early in every feature cycle.
- Continued development of the Sharp Rewards iOS application, iterating on new features, performance improvements, and UI enhancements using Swift and SwiftUI.
- Established mobile engineering standards for a growing team: code review protocols, branching strategy, and end-to-end release management workflows.

Senior iOS Application Developer

MCN Solutions Pvt Ltd Jul 2014 – Dec 2025 (11.5 years) | Noida, India

- Led a team of 5 iOS developers across the full development lifecycle — planning, architecture, code reviews, and mentoring — shipping 15+ iOS applications across health, wellness, and productivity domains.
- Architected modular, testable codebases using MVVM and VIPER patterns, establishing clear module boundaries and coding standards that simplified maintenance and accelerated onboarding for new developers.

- Integrated RESTful APIs, Core Data, HealthKit, and Firebase to power real-time data sync, analytics, and health-monitoring features across multiple production apps.
- Implemented In-App Purchases, background fetch, and push notifications; directly contributed to a 25% revenue increase in the flagship product.
- Profiled and optimised apps using Instruments and GCD, reducing average app launch time by 30% and eliminating UI jank in scroll-heavy views.
- Built and maintained automated CI/CD pipelines with Bitrise and Fastlane integrated into TestFlight, accelerating release cadence by 50% and reducing manual deployment errors.
- Collaborated with designers, QA engineers, and product managers in Agile sprints; consistently delivered milestones on schedule.
- Facilitated internal iOS knowledge-sharing sessions, driving team-wide adoption of Swift Concurrency (Async/Await) and Combine-based reactive patterns.

KEY PROJECTS

Sharp Rewards

Swift · SwiftUI · MVVM · RESTful APIs · Firebase · In-App Purchases

- A rewards-driven personal and professional growth platform allowing users to earn, track, and redeem points tied to skill development, career milestones, and measurable performance targets.
- Sole iOS engineer for the full product lifecycle — designed the architecture, integrated APIs, built the rewards wallet, and managed all App Store submissions from initial launch through ongoing iterations.
- Implemented real-time wallet synchronisation, push notification campaigns, and dynamic reward catalogues, directly improving user retention and engagement metrics.

EDUCATION

Master of Computer Applications (MCA)

Uttar Pradesh Technical University (UPTU) | 2013

Bachelor of Science — Mathematics (B.Sc)

Chhatrapati Shahu Ji Maharaj University (CSJMU) | 2009
